

Help us to improve the ReSPECT process by sharing your experience

Person-centred care and treatment recommendations are important. Resuscitation Council UK introduced the Recommended Summary Plan for Emergency Care and Treatment (ReSPECT) process to support meaningful conversations about future emergency care and treatment between health professionals and individuals/their family.

If you have had a ReSPECT conversation, or you have been involved in another person's ReSPECT conversation, we'd love to hear from you.

If you know someone who has had a ReSPECT conversation who may not be able to complete the survey online by themselves, we'd appreciate if you could support them by helping them to complete the survey.

**Please complete our survey to help us understand:**

- ✓ Your experience of the ReSPECT conversation
- ✓ How well the form summarises the care and treatment recommendations agreed
- ✓ Your opinions on existing information materials
- ✓ Your thoughts on any other ReSPECT materials that would be useful to you

Click on the QR code or enter the website address to access the survey.
